ENVIRONMENTAL CHEMISTS

Analysis For Total Metals By EPA Method 200.8

Client ID: M117432
Date Received: 08/30/07
Date Extracted: 09/04/07
Date Analyzed: 09/04/07
Matrix: Water
Units: ug/L (ppb)

Client: Alaskan Copper Works
Project: PO# M117432, F&BI 708381
Lab ID: 708381-01 x10
Data File: 708381-01 x10.009

Instrument: ICPMS1 Operator: HR

Lower Upper Internal Standard: % Recovery: Limit: Limit: Germanium 103 60 125

Concentration ug/L (ppb)

Chromium 322
Nickel 229
Copper 121
Zinc 35.8

QUALITY ASSURANCE RESULTS FOR THE ANALYSIS OF WATER SAMPLES FOR TOTAL METALS USING EPA METHOD 200.8

Laboratory Code: 708387-03 (Duplicate)

		Sample	Duplicate		Acceptance
Analyte	Reporting Unit	s Result	Result	Difference	Criteria
Chromium	ug/L (ppb)	10.2	10.1	1	0-20
Nickel	ug/L (ppb)	44.2	42.7	3	0-20
Copper	ug/L (ppb)	<1	<1	nm	0-20
Zinc	ug/L (ppb)	<1	<1	nm	0-20

Laboratory Code: 708387-03 (Matrix Spike)

		Spike	Sample	Percent Recover	The state of the s	е
Analyte	Reporting Units	200	Result	MS	Criteria	
Chromium	ug/L (ppb)	20	10.2	51 b	50-150	
Nickel	ug/L (ppb)	20	44.2	37 b	50-150	
Copper	ug/L (ppb)	20	<2	47 vo	50-150	
Zinc	ug/L (ppb)	50	<2	47 vo	50-150	

Laboratory Code: Laboratory Control Sample

		Spike	Percent Recover		е
Analyte	Reporting Units	s Level	LCS	Criteria	
Chromium	ug/L (ppb)	20	103	70-130	
Nickel	ug/L (ppb)	20	103	70-130	-17
Copper	ug/L (ppb)	20	102	70-130	
Zinc	ug/L (ppb)	50	98	70-130	

ENVIRONMENTAL CHEMISTS

Data Qualifiers & Definitions

- a The analyte was detected at a level less than five times the reporting limit. The RPD results may not provide reliable information on the variability of the analysis.
- A1 More than one compound of similar molecule structure was identified with equal probablility.
- **b** The analyte was spiked at a level that was less than five times that present in the sample. Matrix spike recoveries may not be meaningful.
- ca The calibration results for this range fell outside of acceptance criteria. The value reported is an estimate.
- c The presence of the analyte indicated may be due to carryover from previous sample injections.
- d The sample was diluted. Detection limits may be raised due to dilution.
- ds The sample was diluted. Detection limits are raised due to dilution and surrogate recoveries may not be meaningful.
- dv The sample was diluted due to insufficient sample volume. Detection limits are raised due to dilution
- fb The analyte indicated was found in the method blank. The result should be considered an estimate.
- fc The compound is a common laboratory and field contaminant.
- fp Compounds in the sample matrix interfered with quantitation of the analyte. The reported concentration may be a false positive.
- **hr** The sample and duplicate were reextracted and reanalyzed. RPD results were still outside of control limits. The variability is attributed to sample inhomogeneity.
- ht The sample was extracted outside of holding time. Results should be considered estimates.
- ip Recovery fell outside of normal control limits. Compounds in the sample matrix interfered with the quantitation of the analyte.
- j The result is below normal reporting limits. The value reported is an estimate.
- J The internal standard associated with the analyte is out of control limits. The reported concentration is an estimate.
- jl The analyte result in the laboratory control sample is out of control limits. The reported concentration should be considered an estimate.
- jr The rpd result in laboratory control sample associated with the analyte is out of control limits. The reported concentration should be considered an estimate.
- lc The presence of the compound indicated is likely due to laboratory contamination.
- L The reported concentration was generated from a library search.
- nm The analyte was not detected in one or more of the duplicate analyses. Therefore, calculation of the RPD is not applicable.
- pc The sample was received in a container not approved by the method. The value reported should be considered an estimate.
- pr The sample was received with incorrect preservation. The value reported should be considered an estimate.
- ve The value reported exceeded the calibration range established for the analyte. The reported concentration should be considered an estimate.
- vo The value reported fell outside the control limits established for this analyte.
- x The pattern of peaks present is not indicative of diesel.
- y The pattern of peaks present is not indicative of motor oil.

September 10, 2007

Gerry Thompson, Project Manager Alaskan Copper Works 628 South Hanford Seattle, WA 98134

Dear Mr. Thompson:

Included are the results from the testing of material submitted on August 30, 2007 from the Metro Self Monitor, PO# M117432, F&BI 708381 project. There are 4 pages included in this report. Any samples that may remain are currently scheduled for disposal in 30 days. If you would like us to return your samples or arrange for long term storage at our offices, please contact us as soon as possible.

We appreciate this opportunity to be of service to you and hope you will call if you should have any questions.

Sincerely,

FRIEDMAN & BRUYA, INC.

Michael Erdahl Project Manager
